Caroline N. Watson General Counsel - South Carolina

May 23, 2001

Street Address: 1600 Williams Street, Suite 5200 Columbia, South Carolina 29201

Generic Proceeding to Establish Prices for

BellSouth Telecommunications, Inc.'s

Interconnection Services, Unbundled Network

Elements and Other Related Elements and Services SERVICE COMMIS

Dear Mr. Walsh:

Enclosed for filing please find the original and 15 copies of BellSouth's Revised Response to the Comsumer Advocate's Second Set of Interrogatories in the abovereferenced matter.

By copy of this letter, I am serving these responses upon all parties of record.

Sincerely,

Caroline N. Watson

CNW/nml

Enclosure

cc: All Parties of Record

BellSouth Telecommunications, Inc. South Carolina Public Service Commission Docket No. 2001-65-C

Consumer Advocate 2nd Set of Data Request

May 15, 2001

Item 2-1 (REVISED)

Page 1 of 1

REQUEST: (Reference: Daonne Caldwell Testimony – Page 35) "The average effective fill for distribution cable in BellSouth's study for South Carolina is 41%" and "average effective fill of the copper feeder cables in this filing is 74%."

Re-run the BSTLM model and Cost Calculator utilizing the Fill Factors suggested by the FCC in the Tenth Report and Order and provide the cost summary results.

FCC DISTRIBUTION AND FEEDER FILL FACTORS

Density	Feeder	Distribution	
0 5	70.0% 77.5%	50.0% 55.0%	
100	80.0%	55.0% S. C. PUBLIC S	SERVICE COMMIS
200 650	82.5% 82.5%	60.0% 70.0%	EIVF
850	82.5%	and IL/II	2 3 2001
2,550	82.5%	75.070	
5,000 10,000	82.5% 82.5%	75.0% I E C	E I V — G DEPARTMENT
AVERAGE	80.28%	65.56%	PERMIMENT

(FCC 99-304, Tenth Report and Order. Released November 2, 1999)

RESPONSE: See enclosed summaries (files Total_Summary_05-19-01_Avrage.xls and Final Cost Summary 05-19-01.xls).

BellSouth Telecommunications, Inc.
South Carolina Public Service Commission
Docket No. 2001-65-C
Consumer Advocate 2nd Interrogatories
May 15, 2001
Item 2-3 (REVISED)
Page 1 of 1

REQUEST: How do you change the factors for distribution & feeder fill in the BSTLM model? Provide walk-through for re-running the BSTLM model and corresponding Cost Calculator after inputs have been changed in the BSTLM model.

For example, change the distribution and feeder fill factors to those specified by the FCC in its Tenth Report and Order (see Interrogatory 2-2) for any (or all) of the wire centers. After indicting the steps necessary to run the above change, please provide the printout for the "Cost Cal File" from the Loop Model (BSTLM). Provide instructions for incorporating the changes in the Loop Model to the Cost Calculator. Provide printouts from the sequential steps and finally, the Element Detail Report for the selected wire center(s).

RESPONSE: See Attachment No. 1.

Making Requested Changes in the BSTLM©

To make the changes requested the user would need to determine if he/she wants to retain the original BellSouth Scenario or create a new one. The steps are almost the same either way except you skip the screens below that create the new scenario. Below are screen shots of the steps to follow. To make input changes, open the scenario you want to change. Click on Edit Inputs button, click on scroll down bar and select Engineering Rules, click on the Network Rules tab and edit the input Distribution Sizing Routine and change the input to Engineering Fill. Select the Copper Cable Sizing tab and enter the percent fills as desired. Click on the Close button. Next proceed to the Process Wizard and run the model and create the Cost Calculator and Report files for the desired UNE's for StateWide average and Deaveraged results as needed. The results files will be found under the scenario folder that was run, within the model directories. Before the calculator files can be run through the Calculator©, you must run Remove_Dot.xls on these files. This file is located on the BSTLM© CD under the Helpful Macros folder. This file is a Macro and will step you through the process. Remove_Dot.xls simply removes the period (.) following the CLLI code for the statewide average files.

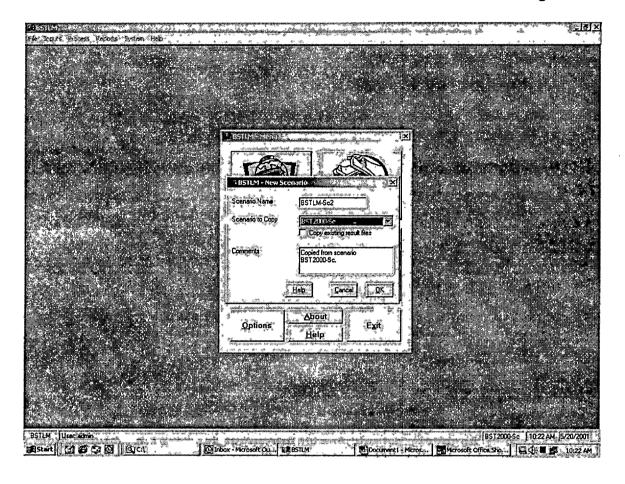

Also a macro name Dist Adjustment.xls will need to be run and can be found on the CD. This macro is necessary to correctly determine the distribution sub-loop elements' (A.2.2. A.2.11, A.2.40, A.2.42) costs. Each of these cost elements required an adjustment to the TELRIC Material values computed by the BSTLM® and submitted as input to the BellSouth Cost Calculator[©]. The significance and purpose of the adjustment is to remove the quantity of loops with straight feeder (designated as IndoorCU) from the total quantity of loops. This adjustment, which was necessary for both the state average and deaveraged files, required subtracting the Node Service Count for IndoorCU from the Total Node Service Count. The resulting difference was then divided by the Total Node Service Count to obtain a ratio of the Node Service Count Excluding IndoorCU to the Total Node Service Count. To model the effect of eliminating the straight feeder facilities from the distribution materials, the input to the BellSouth Cost Calculator© was divided by this ratio for all FRCs/Sub-FRCs except 52C. Since this adjustment was required at the state and wire center level, a macro was developed to perform the computations. The macro derived the ratio from the *.csv files and applied it to the input column of the Calculator® files. At this point, close the BSTLM® and start the Calculator©.

Running Revised Loop Model® Data through the BellSouth Cost Calculator®

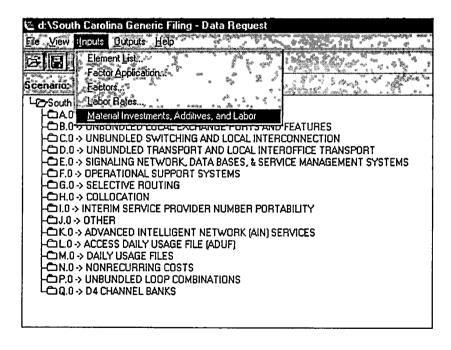

After Starting the BellSouth Cost Calculator© (BSCC), open the appropriate BSCC scenario. In other words, if the BSTLM© data is state average, open the "State Average" scenario; if the BSLM© data is wire center, open the "State Deaverage" scenario. This example will demonstrate importing state average data.

Open the BSCC© and select File|Open Study Scenario. The Open Study Scenario screen will appear. Select the appropriate scenario (in this example, "State Average").

2001-65-C Consumer Advocate 2nd Data Request Item No. 2-3 Attachment No. 1 Page 21 of 30

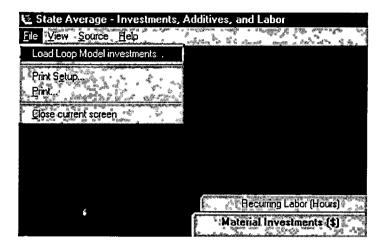

At the next screen select Inputs | Material Investments, Additives, and Labor.

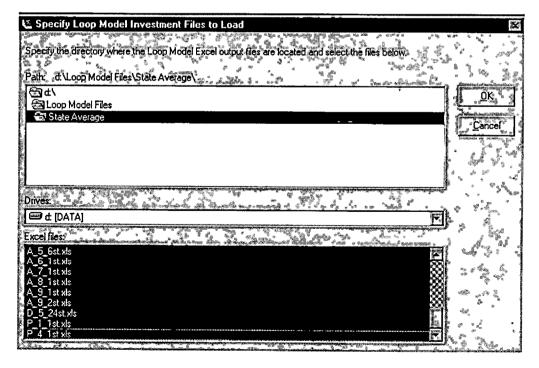

2001-65-C Consumer Advocate 2nd Data Request Item No. 2-3 Attachment No. 1 Page 22 of 30

Since we will be replacing ALL loop investments, select File|Load Loop Model Investments...

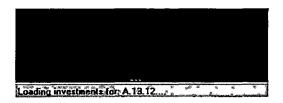

When the "Specify Loop Model Investment Files to Load" box appears, use it to navigate to the location of your BSTLM© data files. Be sure the file types match the scenario!! State Average with State Average, State Deaverage with Wire Center. In the box called "Excel Files" click on the first file and drag down until all files are highlighted. Click "OK".

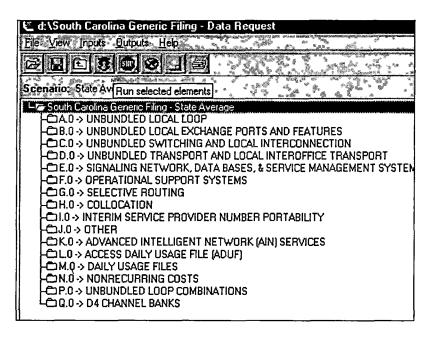

Across the bottom of the screen the progress of the load will be shown. When the load is complete the words "Load Complete" will momentarily appear in this space.

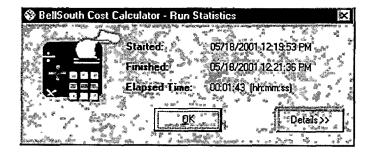

2001-65-C Consumer Advocate 2nd Data Request Item No. 2-3 Attachment No. 1 Page 23 of 30

Select File Close Current Screen to return to the main screen. Select the top folder in the outline and click on the Stoplight to run. The progress of the run will be displayed on a progress bar at the bottom left of the screen.

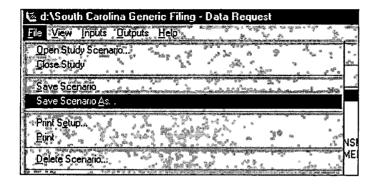

When the run is complete, a message box will appear like below. Click "OK".

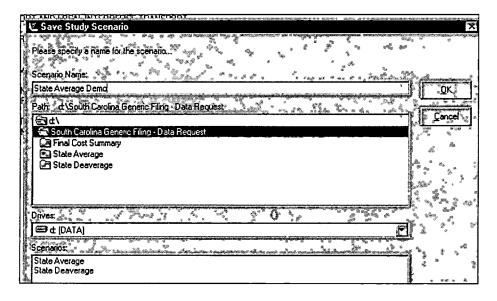

Select File|Save Scenario As...

2001-65-C Consumer Advocate 2nd Data Request Item No. 2-3 Attachment No. 1 Page 24 of 30

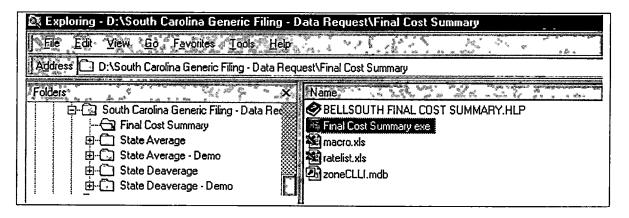

When the "Save Study Scenario" box appears, type the name you want to give the scenario. Click "OK". Then select File|Close Study.

Repeat the above steps for the State Deaverage scenario, however, this time load the Wire Center input files from the BSTLM©.

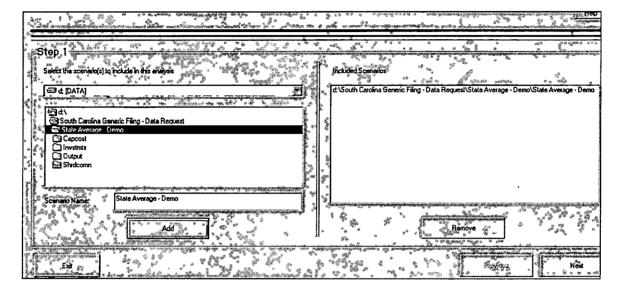

Running the Final Cost Summary

After both the State Average and State Deaverage scenarios have been run, open Windows Explorer and locate the Study Directory where you have saved your scenarios. Under the study directory you will see a directory called "Final Cost Summary." Double click on this directory to open it. Under this directory you will see a file called Final Cost Summary.exe." Double-click on this file to open the Final Cost Summary Application.

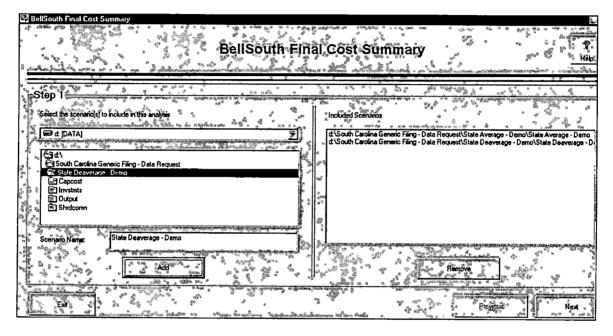

2001-65-C Consumer Advocate 2nd Data Request Item No. 2-3 Attachment No. 1 Page 26 of 30

Using the selection box on the left, locate the study directory that contains the scenarios that you saved in the previous steps. Double-click the <u>your</u> State Average scenario. The name of the scenario will appear in the "Scenario Name" box at the lower left. Click the "Add" button to place it in the "Included Scenarios" box on the right.

Consumer Advocate 2nd Data Request Item No. 2-3
Attachment No. 1
Page 27 of 30

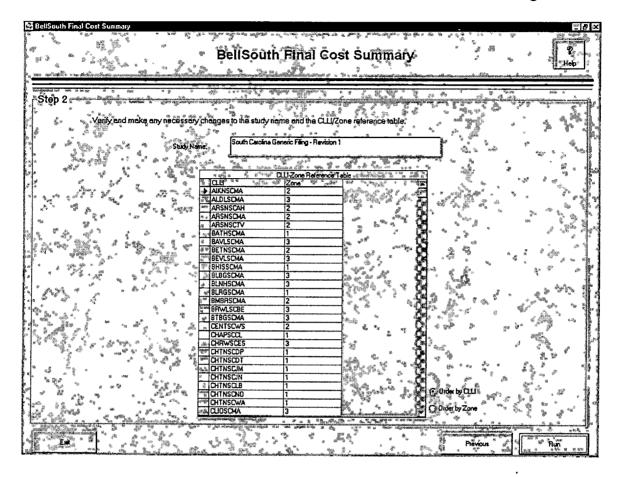

Using the selection box on the left, proceed back up the file folder tree to find the deaverage scenario. Double-click on <u>your</u> Sate Deaverage scenario. As before, the name of the scenario will appear in the "Scenario Name" box. Click the "Add" button to place it in the "Included Scenarios" box on the right. Click the "Next" button at the lower right.

At the next screen, click the "Run" button at the lower right.

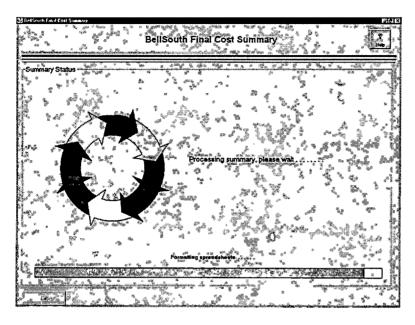

Į.

2001-65-C Consumer Advocate 2nd Data Request Item No. 2-3 Attachment No. 1 Page 28 of 30

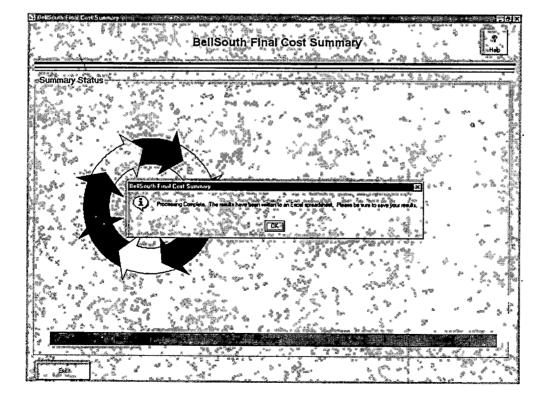

2001-65-C Consumer Advocate 2nd Data Request Item No. 2-3 Attachment No. 1 Page 29 of 30

A Progress screen will appear.

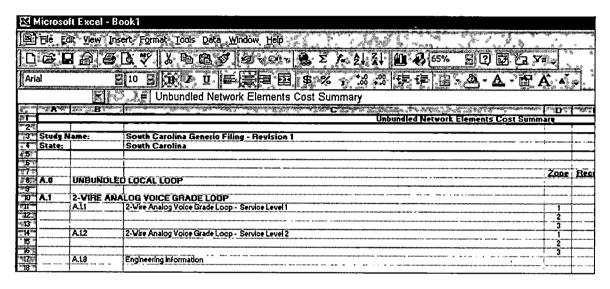

When the processing is complete a screen will pop up indicating that the process is complete. It will also remind you to save your results. Click "OK".

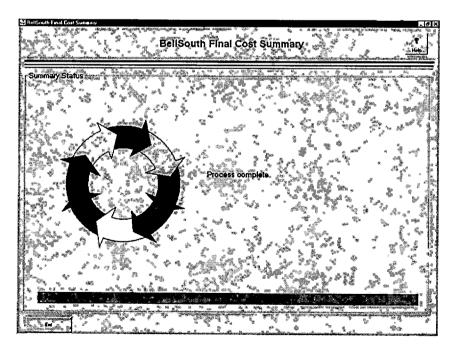

2001-65-C Consumer Advocate 2nd Data Request Item No. 2-3 Attachment No. 1 Page 30 of 30

Excel will open with the results of the run. Be sure to save you results to a file name of your choice. Once you have done this, close Excel.

Click the "Exit" button at the lower left to close the Final Cost Summary application.

BellSouth Telecommunications, Inc.
South Carolina Public Service Commission
Docket No. 2001-65-C
Consumer Advocate Interrogatories
May 15, 2001
Item No. 2-4 (REVISED)
Page 1 of 1

REQUEST: What is BellSouth's current network utilization rate? How was the current

rate used to estimate the future expected utilization?

RESPONSE: As of April 2001, 80.7% of the installed access line capacity is being used

in South Carolina. This rate is derived by dividing the sum of total

working lines plus Quick Service lines plus defective pairs by the sum of the total physical copper pairs available plus equivalent digital loop

carrier.

٤

BellSouth Telecommunications, Inc.
South Carolina Public Service Commission
Docket No. 2001-65-C
Consumer Advocate Interrogatories
May 15, 2001
Item No. 2-7 (REVISED)
Page 1 of 2

REQUEST: (Reference: Cynthia Cox Testimony – Page 30) Under what conditions is BellSouth proposing to provide line sharing? Specifically, is BellSouth offering line conditioning and splitter service to CLECs that have purchased the loop/port combination, or is line sharing only offered when BellSouth is the voice service provider?

٤

a) If BellSouth is only offering access to the high frequency portion of the loop on loops that the incumbent LEC is providing analog voice service, explain the reason for not offering splitters as a UNE to CLECs that are voice service providers wishing to line share.

RESPONSE: BellSouth provides CLECs access to the high frequency portion of the loop network element as an unbundled network element where BellSouth is providing, and continues to provide, analog circuit-switched voice-band services on the particular loop for which the CLEC seeks access. The provision of xDSL-based service by a CLEC and voiceband service by an ILEC on the same loop is referred to as "line-sharing." As explained in Ms. Cox's testimony (pages 28-31), ILECs are only required to provide line sharing where the ILEC also provides the retail voice service. ILECs are not required to provide line sharing to requesting carriers that are purchasing the loop/port combination. BellSouth may maintain control over the loop and splitter equipment and functions, and will provide CLECs with loop and splitter functionality that is compatible with any transmission technology that the CLEC seeks to deploy using the high frequency portion of the loop. BellSouth also offers CLECs the option of purchasing, installing, and maintaining central office POTS splitters in its collocation arrangement. BellSouth will condition loops to enable CLECs to access the high frequency portion of the loop spectrum

Line splitting, as compared to line sharing, occurs when a CLEC is the voice provider over a UNE loop, a data LEC is the data provider, and BellSouth is not an active party in the retail business arrangement with the end user.

BellSouth Telecommunications, Inc.
South Carolina Public Service Commission
Docket No. 2001-65-C
Consumer Advocate 2nd Interrogatories
May 15, 2001
Item No. 2-7 (REVISED)
Page 2 of 2

RESPONSE: (Cont'd)

With Line Splitting, BellSouth's role is limited to assisting in facilitating the other party's business arrangement, and will willingly do so.

If BellSouth is currently the voice provider, and a Data LEC is providing the data services, and the end user subsequently chooses a CLEC for voice service (a "Voice CLEC"), then the following would occur:

If the original line sharing arrangement was established with a Data CLEC-owned splitter, then BellSouth would not be involved with the splitter provisioning and, accordingly, any decisions regarding use of the splitter would be left up to the Data CLEC. If, however, the original line sharing arrangement was established with a BellSouth-owned splitter, then BellSouth would allow the Data CLEC to continue leasing the BellSouth splitter under the following conditions:

- 1. The existing Data CLEC remains the end user's advanced services provider; and
- 2. The Data CLEC has an agreement with the Voice CLEC to use the upper frequency spectrum of the loop to continue providing the advanced services.

The applicable recurring charges to be paid by the Voice CLEC for this line splitting arrangement will be the loop, the port and two cross connects. The applicable nonrecurring charges to be paid by the Voice CLEC for this line splitting arrangement will be the nonrecurring rate for the loop-port combination (switch-as-is).

Where a line sharing arrangement does not already exist, BellSouth will work cooperatively with CLECs to develop methods and procedures to develop a process whereby a Voice CLEC and a Data CLEC may provide services over the same loop. Under such process, BellSouth will deliver a loop and a port to the collocation space of either the Voice CLEC or the Data CLEC. In this scenario the loop and port cannot be a loop and port combination (i.e., UNE-P), but must be individual stand-alone network elements. The Voice CLEC or the Data CLEC shall be responsible for connecting the loop and port to a CLEC-owned splitter. BellSouth shall not own or maintain the splitter used for this purpose.

BellSouth Telecommunications, Inc.
South Carolina Public Service Commission
Docket No. 2001-65-C
Consumer Advocate 2nd Interrogatories
May 15, 2001
Item No. 2-8 (REVISED)
Page 1 of 1

REQUEST: How is line sharing priced? Provide the calculations for creating costs for the high frequency portion of the loop.

- a) Is the cost of the loop shared evenly between the voice service provider and the provider of xDSL service?
- b) If not, explain how costs and rates are calculated.

RESPONSE: a) There is no additional charge for the high frequency portion of the loop over and above the basic loop charge. The provider of record for the voice service is responsible for the loop charge. There is no sharing of cost between the voice service provider and the data provider.

b) Access to the high frequency portion of the loop is provided via a splitter. See Cost Reference No. J.4, as contained in Exhibit CKC-1, dated April 25, 2001, for applicable rates for splitters and splitter activation.
